-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Applicant is advised that the Notice of Allowance mailed on June 15, 2004 is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.

The indicated allowability of claims 1-4 is withdrawn in view of the newly discovered reference(s) to Morris and Mossman. Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morris (4,643,450) in view of Mossman. Morris discloses in the Figure and in the specification a speed reading system comprising a plurality of printed sheets, each sheet having a vertically extending scan bar 10, printed lines of indicia extending

Art Unit: 3714

perpendicular to the can bar, where selected grouped scan words are in a bold font to distinguish from non-scan words, a plurality of scan line indicators 15 corresponding to the scan words, and a second scan bar 16 which is parallel to the first scan bar and on the other side of the scan line indicators. Morris fails to disclose that the scan words are presented in a larger type. However, it is well known to place words in a larger font to emphasize those words within a group of words. Mossman discloses one example in column 2, lines 10-12, where a word temporarily increases in size to draw a reader's attention to that word. It would have been obvious to one of ordinary skill in the relevant art to modify the device of Morris by providing the scan words in a larger font for the purpose of providing an additional visual emphasis to the words. With respect to claim 2, each scan line indicator of Morris is a solid color square. With respect to claim 3, the precise length of each scan line is not explicitly disclosed by Morris, but the scan lines of Morris do appear to be of similar length to those of the present invention. With respect to claim 4, the recited limitation is an obvious variation on the teachings of the prior art. One of ordinary skill would understand that a larger increase in size would result in a larger emphasis on the scan word.
